## CREATION OF A FIORI-BASED PURCHASING REPORTING SYSTEM

Minimum effort – maximum benefit for management and specialist departments

**100 %**  
In Time &  
in Budget

**100 %**  
Standard in the  
Fiori frontend

**10**  
Purchasing  
KPIs

**10**  
Days  
Project duration

**In brief ...**

**Implementation Highlights**

- Creation of purchasing reporting including 10 Fiori apps in 10 days
- Lean solution with many reporting apps for a small budget
- Evaluation of KPIs across the entire purchasing process
- Development of purchasing reporting with standard Fiori apps and supplementation with KPIs developed in-house
- Implementation of Fiori apps without programming in the frontend

**INITIAL SITUATION**

Procurement reporting that is properly integrated into the SAP system landscape helps to increase the importance of procurement in the company.

At the start of the project, Weig did not yet have such a purchasing reporting system for management and specialist departments. It was not possible to pull information on order volumes, suppliers and product and purchasing groups from a system at the touch of a button and in real time.

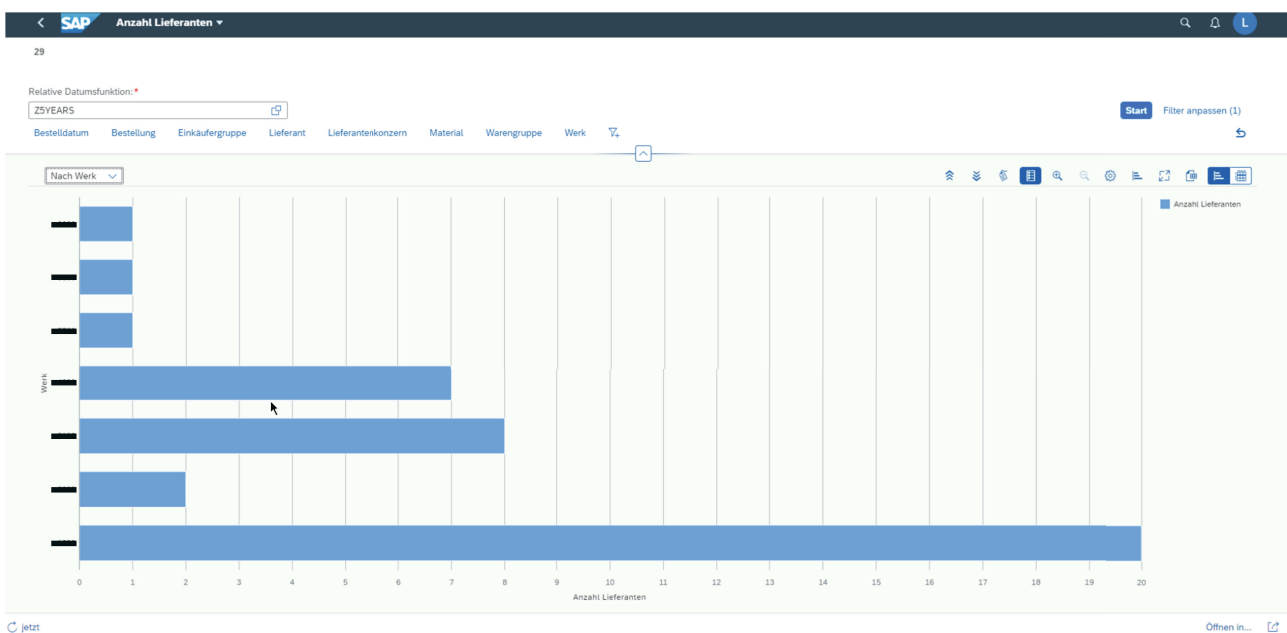

Thanks to CONSILIO's expertise, we have expanded our purchasing reporting with a minimal budget and gain a detailed insight into the performance of purchasing with the help of the relevant key figures.

**CHALLENGE**

- Definition of purchasing KPIs and introduction of purchasing reporting with implementation as close to standard as possible
- Structure of CDS views with optimal function in Fiori
- Preparation of purchasing reporting with as little effort as possible and at the same time maximum benefit for management and specialist departments

Ole Pötter, Purchasing Manager,  
WEIG Holding GmbH & Co. KG

## PROJECT GOAL

- Creation of purchasing reporting for management and specialist departments using purchasing KPIs and implementation as close as possible to the SAP standard
- Strengthening the basis for negotiations with suppliers
- Monitoring of purchasing performance and early identification of optimization potential

## MAIN BENEFIT OF THE NEW SOLUTION

- Simple reporting of all relevant KPIs
- Purchasing reporting in real time
- In-house developed apps with drill-down functionality
- Use of the Fiori Launchpad for future reporting
- In addition to the visualized key figure apps, a detailed report „Orders 360 degrees“ was created
